

EndDoc

The **EndDoc** function ends a print job. This function replaces the ENDDOC printer escape.

```
int EndDoc(  
    HDC hdc        // handle of device context  
);
```

Parameters

hdc
Identifies the device context for the print job.

Return Value

If the function succeeds, the return value is greater than zero.

If the function fails, the return value is less than or equal to zero. To get extended error information, call [GetLastError](#).

Remarks

Applications should call **EndDoc** immediately after finishing a print job.
